SimpleCom Tools To Participate at REMOTE Monitoring Control & Automation/Onsite Power 2005

Remote Monitoring, Control & Automation and Onsite Power will be held October 6-7, 2005 at the Peabody Orlando Hotel in Orlando, FL. This is the fourth year for these unique conferences that bring together the technology innovators and users from multiple industries, including utilities, power, oil & gas, telecom, industrial, water & public utilities, agriculture and facilities management.

SimpleComTools provides software tools and hardware appliances that access and distribute remote asset logic across the M2M, Security, and Telematics value chains. SimpleComTools products are designed for network integrators and application service providers who need real-world solutions for machine-to-machine communications, telemetry and remote data collection, wireless connectivity, access control, and asset management.

"With the help of technology leaders such as SimpleComTools, Remote Monitoring, Control & Automation and Onsite Power 2005 is turning out to be fantastic event for the remote and onsite power market," said conference chairman John Cargile. "Our attendees and exhibitors alike are excited about the possibilities these events will offer, which include great networking opportunities and the chance to build lasting business relationships with numerous contacts in multiple markets."

For more information on this two-day conference and to view the current program, please visit the web site at: http://www.remotemagazine.com/rem_conf_index.htm.

The conference is organized by REMOTE magazine and produced by Webcom Communications Corp., the magazine's publisher.
